## **Floriculture Crop Insurance**

## Did you know that floriculture crop insurance is available?

The USDA Risk Management Agency (RMA) and Farm Service Agency (FSA) administer crop insurance. The current options for floriculture crop insurance are Whole-Farm Revenue Projection and Specialty Crop Insurance coverage under RMA and Noninsured Crop Disaster Assistance Program (NAP) covered FSA.

- Whole-Farm Revenue Projection: This insurance covers multiple crops on your property. (RMA)
- Specialty Crop Insurance: This crop insurance is only available for floriculture in certain states and counties. Information on which locations are eligible can be found on the actuarial information browser <a href="https://webapp.rma.usda.gov/apps/actuarialinformationbrowser/CropCriteria.aspx">https://webapp.rma.usda.gov/apps/actuarialinformationbrowser/CropCriteria.aspx</a>. (RMA)
- Noninsured Crop Disaster Assistance Program: This program provides financial
  assistance to crops that are uninsurable when there are low yields, loss of
  inventory, or unable to prevent due to a natural disaster. (FSA)

## How do I find coverage?

Depending on the coverage that you're eligible for you'll need to contact a USDA Risk Management Agency or Local Farm Service Agency Office.
