Progress of the Dairy Farm Report
Selected Financial and Production Factors
Dairy Farm Business Summary
136 New York State Dairy Farms, 2021
June 2022

Jason Karszes and Lauren Augello¹

The objective of the Dairy Farm Business Summary & Analysis Program (DFBS) is to help farm managers improve the financial management of their dairy farm through appropriate use of historical farm data and the application of modern farm business analysis techniques. This information can also be used to track changes within the business, establish goals that will enable the business to better meet its objectives, compare the performance of the farm to other dairy producers, and establish a basis for financial projection and planned changes within the business. This is the final Progress of the Dairy Farm Report for the 2021 business year.

The Progress of the Dairy Farm Report provides averages of selected financial and production measures from 132 New York State Dairy Farms (pages 2-4) that participated in the program for both 2020 and 2021 that had submitted records by June 6th, 2022. The report is also broken down into four herd size categories to provide additional comparison reports by herd size. The business charts report data for all farms that participated in 2021.

- | | |
|--|-------------|
| 1. Farms with Less Than 500 Cows | Pages 5-7 |
| 2. Farms with 500 Cows to 999 Cows | Pages 8-10 |
| 3. Farms with 1,000 Cows to 1,499 Cows | Pages 11-13 |
| 4. Farms with 1,500 and Greater | Pages 14-16 |

To utilize these reports, begin by comparing how your farm changed from 2020 to 2021 to the change in the average of all farms report. Then, determine which herd size group most closely represents your farm and compare your financial and production parameters and change to the averages of that group. This benchmarking tool can be helpful for farm owners and managers to find areas of opportunity and strengths within their businesses. If you are a DFBS participant, you can work with your extension educator to look at these comparisons for all farms and your farm business.

These benchmarks and comparisons are provided for comparison purposes only and represent the performance of those farms participating in the Dairy Farm Business Summary and Analysis Program in New York State. These numbers do not represent the average for all dairy farms across New York and are from farms that are generally considered above average dairy farms in New York. No analysis or interpretation of these benchmarks and ratios is provided.

Farm Business Chart

The Farm Business Chart is a tool that can assist in analyzing your business. The five numbers in each column represent the average of each quintile of farms included in the DFBS. You can compare your farm's data to others in the DFBS by drawing a line through or near the number in each column which most closely represents your current level of performance. Each column is sorted independently. Use this information to identify areas of opportunity in your business.
