

Economic Benefits of Persistent Biocontrol Nematodes & Extreme Weather Events and Maintaining Forage Quality

Biocontrol nematodes are microscopic round worms in the soil which only attack insects in the soil or on the soil surface.

- Speakers: Mike Hunter, Field Crops, CCE North Country Regional Ag Team & Joe Lawrence; Pro Dairy Forage Systems Management, Sr. Extension Associate.
- Learn how biocontrol nematodes work, how to apply and timing.
- Look at the research done at Musgrave Research Farm in Aurora on biocontrol nematodes.
- Find out where you can get Biocontrol Nematodes which are adapted to NY and will persist across growing seasons.
- Assessing forage crop damage from recent weather events, flood, hail, and wind damage
- Refreshments and donuts will be provided.

Friday, February 9, 2024 12:30pm-2:30pm

Cornell Cooperative Extension
Lewis County

7395 East Road
Lowville, NY 13367
